

Full Legionella Risk Assessment Quotation

Medical Supermarket are pleased to offer the quotation for Identification and assessment of the risk of exposure to Legionella bacteria and a Water Hygiene Survey.

To carry out:

1. A full risk assessment of all water services at your surgery
2. Full control scheme and remedial actions to be identified
3. Visual audit with asset register provided
4. Technical back up provided when report produced

The assessment will take a few hours, depending on the size of the surgery and number of sites to be assessed. Please note that there is no disruption to site's water services during this time, all that's needed is access to every room that uses water.

Once the assessment has been completed a report will be provided with the findings of the assessment. The objectives of the report are usually to;

- Record the current situation
- Record the agreed action plan and priorities to reduce risk exposure
- Provide guidance on implementing the improvements.
- Support observations and subsequent recommendations with
- Photographs
- Document ensures compliance with ACOP L8
- Document conforms with BS8580
- Document will also provide a guide to your water system

All for the one off fee of: £340 + VAT

Please let us know if there are any queries, or if you wish to proceed with this service.
Any remedial works will be noted but not carried out

Should you wish to go ahead with the assessment.

REQUIRED DOCUMENTS

For the Bison Assist Surveyor to carry out the correct checks the practice is asked to make the following available:

- Full access to carry out the service – failure to get access all parts of the water system may affect the assessment of risk of the system(*)
- Induction training (if required)
- Provision of the assistance from a competent escort familiar with the site and water systems who will also be responsible for the assessor's safety.
- Any previous Risk Assessment Reports including water schematics
- Testing logbooks (water temperatures, water sampling, cleaning regimes)
- Written scheme
- Training logs
- Inspection and Maintenance Records

Please be aware that the on-going tasks such as recording temperatures, flushing the low used outlets, cleaning the dental chairs/showers/taps, keeping records etc. remain the client's responsibility.

(*) Note: The assessment of risk of the system may be affected if any unavoidable omissions are encountered. By such case, your risk assessor shall note in your assessment report all the omissions or site restrictions faced. Upon confirmation of such omissions an additional site visit encountering a call out fee can agreed.
